CLASSIFICATION DO TO DISTRIBUTE

FINANCIAL MODEL

18-Month Proof Plan · 24-Month Survival Path

Pre-Seed \$750K SAFE

Classification: Confidential material

Date: 10 August 2026

Subject: Cognitronics Financial model

Recipient(s): Pre-seed investors, and core-team

We operate in **EUR** (French payroll, EU vendors). The SAFE raises **\$750K USD**; we convert at each tranche wire. Payroll is modelled at **JEI-adjusted** employer cost (×1.5 on net, not ×2). Embedded hire gates on **T2 close + Jetson procurement (M6)** — not before capture proof is live.

Detailed monthly **cash-flow model** available on request. **JEI** is a french tax benefit program for startups with innovating power. It allows to save around 25% on employment taxes for the company.

At a Glance

	18-Month Plan	24-Month Floor
Raise	\$750,000 USD	Same
EUR budget @ 0.93	~€697,500	Same — lower burn
Avg burn (employer cost)	~€39K/mo	~€29K/mo
Team	3 FTE → 4 @ M6	3–4 FTE phased
M18 cash (EUR)	~€72K	~€130K w/ levers
Seed	Open M15–M18	Close M20–24 if needed

What the money buys: structured Cognex capture → simulation benchmark → ROS2 deploy path → Seed-ready proof package. **Not scale — proof.**

Raise · FX · Tranches

Instrument	Post-money SAFE · Delaware corp
Round size	\$750,000 USD
Caps (USD)	6, 000, 000 / 7,500,000 / \$9,000,000 per tier
Spend currency	USD operating account (DE, USA — -ParentCo)

USD/EUR	EUR on full \$750K	M18 buffer
0.95	€712,500	Comfortable
0.93	€697,500	~€72K (plan)
0.90	€675,000	Activate runway levers

Tranche	USD	Unlocks	Target
T1	\$200K	Working Cognex capture prototype	M0
T2	\$250K	Measured learning delta · sim benchmark	M3–M6
T3	\$300K	ROS2 path · TrustVault prototype · Seed package	M6–M9

Use of Funds

Category	EUR	%
Personnel (employer · JEI)	€405,000	58%
R&D / infra (compute · cloud · freelance)	€96,000	14%
Capture hardware (NeuroKinetic + Jetson)	€26,220	4%
G&A (legal · admin · travel)	€38,000	5%
Contingency + M18 bridge	€132,280	19%
Total	€697,500	100%

Hiring · Hardware by Quarter

Quarter	Headcount	Key spend
Q1 (M0–M3)	3 FTE + CTO audit	NeuroKinetic Lean MVP €11.6K (Xsens + Delsys 2ch + MANUS)
Q2 (M4–M6)	3 FTE	EMG expansion €6.6K · +4th FTE (embedded) @ M6
Q3 (M7–M9)	4 FTE	Jetson enclave €8K · T3 close
Q4–Q6	4 FTE	Benchmark · ROS2 deploy · Seed prep

Clone Alpha (~€92K): research access via partnership M9–M10 — not in base budget.

Personnel (18 months · EUR)

Role	Net total	Employer cost (JEI)	Gate
Founder (CEO/COO)	€72,000	€108,000	T1
AI / Robotics engineer	€76,500	€114,750	T1
Applied math & cybersec	€60,000	€90,000	T1
Embedded & robotic integ. (from M6)	€51,500	€77,250	T2–T3
Fractional CTO (6 audits · €2.5K ea.)	€15,000	€15,000	T1+
Total	€275,000	€405,000	

Ramps: AI €3K→€4.5K net (M3+) · Applied €2.5K→€3.5K (M4+) · Embedded €3K→€4.25K (M9+) · CTO @ M2, M4, M6, M8, M10, M12.

CIR (~30% on eligible R&D payroll) accrues ~€100K — refunded Y2, non-dilutive.

Runway Levers

If EUR converts weak or Seed slips past M18, we pull tactical levers — **proof milestones are not traded**, timeline flexes:

- **If Founder defer M1–M3** — would save €18K employer cost
- **Embedded M8 not M6** — could save ~€23K
- **CTO 4 audits not 6 · compute tier-down · defer EMG expansion** — all three combined allow to save an additional ~€26K
- **Convert tranches on strong FX days** — up to +€15K vs 0.93 plan

Stacked: ~€67K+ tactical savings → **24-month survival** at ~€29K/mo without cutting learning delta or ROS2 path.

JEI (×1.5) is already in the base model — ~€90K structural saving vs standard French payroll.

Seed Bridge

Pre-seed	\$750K USD SAFE
Seed target	20M / 50M cap , \$3–5M raise
Trigger	Measured learning delta + ROS2 integration + OEM dialogue
Min cash @ Seed open	≥€72K base (or ≥€130K with levers)
Fallback	SAFE top-up \$100–150K @ same cap
